Re: KJMQ(FM), Lihue, Hawaii
Facility Identification Number: 49898
Hochman Hawaii Four, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed January 13, 2009, on behalf of Hochman Hawaii Four, Inc. ("HHF"). HHF requests further extension of the special temporary authority ("STA") granted on June 19, 2007, for operation of Station KJMQ from a site other than the licensed site.¹

In support of the request, HHF states that local conditions at its construction permit site have prevented it from constructing its authorized, modified facilities (*See Note 1, below*).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KJMQ may continue to operate with the following facilities:

¹ KAWV is licensed for operation on Channel 251C1 (98.1 MHz) with effective radiated power ("ERP") of 51 kW (H&V) and antenna height above average terrain ("HAAT") of 4 meters. Construction Permit BPH-20070605ACG authorizes relocation of the transmitter and operation with ERP of 16 kW (Max-DA, H&V) and HAAT of 280 meters.

Geographic coordinates:	21° 56' 10" N, 159° 26' 43" W (NAD 1927)
Effective radiated power:	0.2 kilowatt (H&V)
Antenna type:	Nondirectional
Antenna height	
Above ground:	5 meters
Above mean sea level:	386 meters
Above average terrain:	236 meters

HHF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 10, 2009**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
